FIG. 262(B)

The diagram shows a memory layout within a dashed rectangular boundary. It contains four main components: a box labeled 'DATA1', a vertical line, a box labeled 'EOF1', a box labeled 'EOF2', and another box labeled 'DATA2'. Above 'DATA1' is the label 'TM'. Above 'EOF1' is the label 'TM'. Above 'EOF2' is the label 'TM'. Above 'DATA2' is the label 'TM'. Between 'DATA1' and 'EOF1' is a vertical line. Between 'EOF1' and 'EOF2' is a vertical line with a small triangle pointing down and the label '-2' above it. Between 'EOF2' and 'DATA2' is a vertical line with a small triangle pointing up and the label 'N+4' below it. A dashed line with an arrow points from the label 'MT' to the top right corner of the dashed boundary.

Diagram illustrating a data structure 46, which is a sequence of five fields:

- ES**: Contains the value 70. Labeled 46a.
- EP**: Contains the value -2. Labeled 46b.
- SDT1**: Contains the value EOF1. Labeled 46c.
- SDT2**: Contains the value EOF2. Labeled 46d.
- SBID**: Contains the value N+4. Labeled 46e.

The fields are connected sequentially, and the entire structure is labeled 46.

Diagram of a program header 46, enclosed in a dashed box. The header contains five fields:

Field Name	Value	Label
ES	70	46a
EP	0	46b
SDT1	EOF1	46c
SDT2	EOF2	46d
SBID	N+4	46e
